No. 08-06/2022-TC/TEC

Date:15-06-2022

Minutes of NWG-11 2nd meeting

Sub: 2nd meeting of the National Working Group No-11 corresponding to ITU-T Study Group-11 for the Study Period 2022-2024 on “Signalling requirements protocols, test specifications and combating counterfeit products”.

A meeting of National Working Group-11 was held at Virtual Platform on Wednesday 15.06.2022 at 11:00 Hrs. The meeting was attended by following members:

<u>Name</u>	<u>Designation</u>	<u>Organisation</u>
1. Mr Prasanth Kumar	DDG (MTCTE)	TEC
2. Mr P.K. Singh	DDG(SA)	DOT
3. Mr P.K. Panda	Director(TC-IV)	TEC
4. Mr S.K Arya	Director(CA)	TEC
5. Mr Tejpal Singh	Director(DS-II)	DOT
6. Mr V.K.Roy	Director(MT)	TEC
7. Mrs Divya Sharma	ADG (TC-II)	TEC
8. Mr Dhanesh Goel	ADG (TC-I)	TEC
9. Mr Anshul Kr. Gupta	AD (CA)	TEC
10. Mr Vimal Kumar Singh	AD(NR)	TEC
11. Mr Sanjay Bhardwaj	ADG(CA)	TEC
12. Mr Naveen Kichar	ADET	DOT
13. Mr Rohit Singh	Program Manager	UL India
14. Mrs Sushma Banodhiya	Team Leader	CDOT
15. Mr Biren Karmakar	Group Leader	CDOT

2. At the outset ADG (TC-II) addressed the meeting by welcoming the members of NWG-11. She informed the participants that 1st meeting of NWG-11 was held on 25.05.2022 and the minutes were circulated to all the members. She further informed the members that three contributions have been received for the upcoming ITU-T SG-11 meeting and the agenda for the today's meeting is to discuss the contributions in the NWG-11 meeting.

3. The first contribution discussed was submitted by Sh. P.K.Singh, DDG (SA), Biren Karmakar, CDOT and Deepak Kumar Gupta, CDOT on the topic “Proposal to create a new work item on requirement, interfaces and generic function of CEIR” against Q15/11. Sh. P.K.Singh, DDG (SA) and Biren Karmakar explained that the contribution proposes the requirement of CEIR implementation and the generic features which could be implemented through CEIR.

The contribution gave reference to the use of CEIR/ national reference database also recommended by ITU through following recommendations -

a) ITU-T Q.5050, “Framework for solutions to combat counterfeit ICT devices”

b) ITU-T Q.5051, "Framework for Combating the use of Stolen Mobile Devices".

c) ITU-T Q.5052, “Addressing mobile devices with a duplicate unique identifier”

They further explained that in order to block duplicate/cloned IMEIs and stolen/lost mobile devices pan country, there's a requirement for a central database of all IMEIs used in a country, categorize them into Permitted/White, Grey and Restricted/Black list and eventually the Mobile Network Operator (MNO) Equipment Identity Register (EIR) can block the Restricted/Black listed devices in its own network. The mobile device blocked in one MNO can still be used in other MNOs. However, to prevent usage of stolen/lost devices in all regions (telecom circles) and different MNOs, a Central Equipment Identity Register (CEIR) needs to be established, which provides these consolidated restricted/black list data to all EIRs in the nation to ensure countrywide blocking of the stolen/lost mobile devices. The queries raised by the members were answered by the presenters satisfactorily.

4. The second contribution was presented by Sh. Tejpal Singh, Director (DS), DOT, HQ on the topic "Consumer Centric Approach for implementation of framework for solutions to combat counterfeit and stolen ICT devices" against Q15/11. He explained that the un-checked proliferation of counterfeit devices poses a serious challenge to Regulators, LEAs, end consumers and economy in general. He further informed the members that the ITU-T Recommendation [Q.5050] has acknowledged the challenges involved and has provided framework for solutions to combat counterfeit ICT devices. He explained that his contribution proposed solution framework to overcome constraints in order to make end consumer a key player in combating counterfeit ICT devices. The two key enablers are suggested in his contribution for providing the solution namely providing enabling platform to check genuineness of ICT devices and education and awareness of risks in using counterfeit ICT devices. During the discussion, suggestions to include implementation options in the contribution was given by the members.

5. The third contribution was presented by Ms. Divya Sharma, ADG (TC-II) and Mr Anshul Kumar Gupta AD (CA) on the topic "Proposal for baseline text of work item Q.TSRT_IoT "Test specifications for remote testing of Internet of Things using the probes" against Q12/11. Sh. Anshul Kumar Gupta further explained the architecture of system for remote testing of IoT-devices using probes and the classification of probes used in IOT device identification and classification.

6. It was decided during the meeting that these three contribution will be submitted for the approval of the competent authority and once approved will be presented from India in the upcoming ITU-T SG-11 meeting to be held in Geneva, Switzerland from 6-15th July 2022.

Director (TC-IV) thanked all the members for sparing their time and attending the meeting.
