3. Regarding the new work item proposal, one member suggested to include more justification and relation with other work items/ recommendations if feasible. In this regard, it was decided that needful will done.

4. Regarding the contribution at Sl. No. 2(v) on Mine Supply Chain, one member suggested to keep it as a Technical Report, however considering the content it was decided to keep the contribution in the present form i.e. a Recommendation as of now.

5. The contribution related to RIS was initially framed as supplement contribution which was also discussed whether to take it as technical report. However considering supplement has more value than technical report, this contribution was decided to take as supplement contribution.

6. On the contributions at Sl. No. 2(x) to 2(xii), some members mentioned that in SG-13 scope is limited to brief security considerations as detailed security considerations can be kept as a New Work Item which may be dealt in SG-17 dealing exclusively with Security. Further, the members suggested that the security considerations need to be specific to the work item and not generic. Accordingly, it was decided that Contributions at Sl. No. 2(x) to 2(xii) may be dropped at this stage and contributor was requested to come up with new contributions having security considerations specific to the work item.

7. Regarding the contributions at Sr. no. 2.xiii regarding low cost minimal basic broadband services by integrating cellular TN with NTN, it was observed that the same had already been submitted by presenter to ITU-D and also for ITU-T, no gap analysis was found to justify the contribution at this stage. Accordingly it was decided to drop this contribution for this meeting. This

contribution may be worked upon to have more novelty with proper gap analysis for discussion in subsequent NWG meeting.

8. The Chairman NWG-13 thanked all the contributors for their hard work. Chair further mentioned that a few contributions were received after the deadline and have to be further worked upon. Those contributions will be further developed and will be considered for next meeting scheduled in the July 2025.

9. The meeting ended with vote of thanks by Director (MT).
